CurtMAR – Short Animation Films in Portuguese
ASPEA- Portuguese Association of Environmental Education
✓ Project **funded by the EEA Grants** and managed by DGPM.

✓ Project CurtMAR aims to promote the identification of younger Portuguese with the Atlantic Ocean: history, culture, blue economy. It will focus also the preservation given, its pollution and degradation.

✓ **CurtMAR** – Short Animation Films in Portuguese, an education and science communication project of the *principles of ocean literacy* coordinated by Portuguese Association of Environmental Education (ASPEA) in partnership with:

- Minho Interior Vocational School (EPRAMI);
- Portuguese Association of Marine Litter (APLM);
- Norwegian school Det Tverrfaglige Kunstinstitutt (DTK).
GOALS

- Mobilize schools for citizenship actions;
- Improve the level of ocean literacy of Younger Portuguese;
- Promote ideas, debate and decisions taking;
- Promote exchange between schools from north to south of Continental Portugal, the Azores and Madeira islands.
- Foster collaborative work, sharing and exchange of experiences and information between Portuguese and Norwegian students (Partner school – DTK), to promote Good Environmental Status of marine and coastal waters in Europe.

HOW?

- Through knowledge sessions in basic, high and vocational schools on Oceans Literacy Principles and an Environmental Short-Film Contest.
  Through the audiovisual production it’s desirable to raise this level of awareness and the effective involvement of younger people, endowed with affinity for information and communication technologies.
The project expects to reach 850 students and 160 teachers; 100 knowledge sessions on ocean literacy subject; 40 short films contest participation; 7 videoconference exchange events between students from Portuguese schools and Norwegian school (DTK), among others.
